

Environmental protection has become common subject compare to last century. We see many companies and organization start to challenge and talk about the environmental issues seriously in world wide bases. In our case, ENERCON has defined "Environmental Protection" as our own business division to foster faster relief of damaged environment and also to prevent or minimize human & natural disasters which are mostly root caused to poor designed developing or unsophisticated project principles. In ENERCON Environmental Protection, we focus mainly on "Water" & "Forest" from the entire dynamic ecosystem. We believe "Water" & "Forest" are the two key elements for creating sustainable society for all of us start challenge.
